CLIP TYPE OPEN SHELVING
ASSEMBLY INSTRUCTIONS

1. PARTS

2. INSTALL SIDE BRACES

NOTE:
Layout posts with angles facing each other. Use a shelf for spacing posts and install braces according to the dimension below.

<table>
<thead>
<tr>
<th>WIDTH</th>
<th>SPACE</th>
</tr>
</thead>
<tbody>
<tr>
<td>12&quot;</td>
<td>13&quot;</td>
</tr>
<tr>
<td>15&quot;</td>
<td>13&quot;</td>
</tr>
<tr>
<td>18&quot;</td>
<td>13&quot;</td>
</tr>
<tr>
<td>24&quot;</td>
<td>14&quot;</td>
</tr>
<tr>
<td>30&quot;</td>
<td>17&quot;</td>
</tr>
<tr>
<td>36&quot;</td>
<td>20&quot;</td>
</tr>
</tbody>
</table>

Braces attach to the inside of the unit.
NOTE: It may be necessary to install braces a hole or two higher if shelf in the way of the brace.

3. INSTALL TOP & BOTTOM

4. INSTALL BACK BRACE

STAND THE UNIT UPRIGHT
Install back braces at the desired height. All bolts and nuts must be tight at this.

Use large handle to tighten all screws for maximum tightness and least wrist fatigue.

For fastening units together, use 1" bolts and nuts.

Place a bolt in the first hole below the top shelf and the first hole above the bottom shelf.
Add nuts and tighten securely.

5. INSTALL SHELVES

Install four clips at desired shelf height. Place shelf on clips and tap down to seat.

Braces in common can be used when joining multiple units.
